

```
public class App {  
    static int FibonacciNumber(int number){  
        int n=number;  
        if(n==1 || n==2) return 1;  
  
        return FibonacciNumber(n-1)+FibonacciNumber(n-2);  
    }  
}
```

Run | Debug

```
public static void main(String[] args){  
    System.out.println(FibonacciNumber(number: 3));  
}  
}
```
