```java
public class App {
  static boolean isPalindrom(int number){
    int temp = number, reversenumber=0, lastnumber;
    for(int i=temp;i!=0;i/=10){
    lastnumber = i % 10;
    reversenumber = reversenumber*10 + lastnumber;

    }
    if(number==reversenumber)
    return true;
    else return false;

  }
Run | Debug
public static void main(String[] args){
  System.out.println(isPalindrom(number: 4004));

 }
}
```
